## “I JUST SAID WHAT?” Body Language that Speaks Louder than Words ©

**One of the hot, new topics on news talk shows these days is Body Language.**

Body Language has, though, been around a long time and will be as long as there are people who use it (and who doesn't?) and others who read it (ditto.)

**This presentation is designed to identify what we "tell" others from our eyes to our feet and even in our everyday dress.** Visual intuition is powerful! Our customers, co-workers, friends and family members often know what we are going to say before we say it - we generally give them all the clues they need.

Learn how to be pleasantly "readable" without being an open book. Additional learning objectives include "reading" what others are trying to tell you as well as how to "open up" a person that has closed you out.

**A terrific PowerPoint with loads of great photos is included as well as a comprehensive handout for the attendee. This mini-workshop can also be a great add-on to the other programs or an entertainment-type presentation.**
